

★ Unprecedented Client Success ★

Our *RemediatorIQ* software was fundamentally crucial in revolutionizing a Florida-based remediation/restoration company, driving a remarkable \$20M acquisition.

Primarily due to the capabilities of our software & mobile app, the company evolved from just a few staff and zero technology, to a cornerstone of success. This led to a consistent 20% annual revenue growth and a quadrupling of their technicians in less than 3 years.

Core Modules.

Technician Mobile App

- The Technician Mobile App emphasizes its crucial role in making on-site documentation a breeze, and ensuring seamless integration with the central system.
- Allows technicians to document remediation sites, measurements & readings.
- Enables photo and video capture of site conditions and progress
- Syncs data with the central system for real-time updates and reports

Client/Claimant Management

- Database for client and claimant info
- Job tracking from initial contact to resolution

Remediation Job Management

- Job assignment and scheduling
- Documentation from authorization to job completion
- Real-time job status and progress tracking
- Time, expense and measurement tracking

Claims Management

- Insurance claim documentation & tracking
- From initial estimates to invoicing and collections

Corporate Client Management

- Account creation and growth strategies
- Centralized management for corporate clients.

Asset and Territory Management

- Tracking of high-value equipment, production machinery and vehicles
- Asset deployment and warehousing info
- Maintenance and mileage logs for vehicles

Integrated Dispatching

- Scheduling and dispatching system for technicians
- Territory and asset management at the regional level

Finance and Expenses

- Expense recording and submission
- Integration with online accounting solutions (e.g., QuickBooks Online)
- Incident reporting

Human Resources Administration

- Staff pay and incentive management
- HR administration including staff certifications & regions/offices management
- Payroll and time tracking

Time Tracking and Invoicing:

- Tracks time spent on jobs and generates invoices and claims documentation.

Marketing Management

- Supports marketing strategies and client relationship management
- Tools for targeted marketing campaigns and client relationship development. It supports lead generation, client acquisition, and retention strategies.

Numerous Dashboards and Reporting.

Role-Specific Dashboards

- Custom overview for managers, technicians, and claims coordinators
- Workload and asset utilization reporting

Expense and Time Management Tools

- Onsite and offsite expense recording
- Time clocking and job time management
- Management tools for the executive team to supervise and make decisions from remote locations

Game-Changing Features.

Automatic Reminders and Reports

Sends automated emails or SMS for reminders and reports on various operational aspects such as productivity reminders, birthdays, corporate expenses, employee benefits, weekly reports, and such more.

All-In-One System

- Unified management of statewide remote technicians
- Real-time numbers based on staff activities
- Customizable documentation for changing insurance company requirements

Mobile Reporting App

- Mobile app for technicians to document job details
- Regional management of distributed workforce

PTO Module

Allows employees to request their days off or paid time off (PTO). Their respective manager needs to approve it, and if approved, it is automatically added to the timesheet for the week.

Custom Dashboards & Documentation

- Tailored interfaces for different roles
- Flexibility to update documents and materials as needed

Built-In Software Integrations.

Included Software Integrations

- Quickbooks Online for accurate accounting.
- Twilio for automatic SMS messages.
- Amazon AWS backups database.
- Many more upon request.

Use Cases Beyond Remediation.
